## PRODUCT OVERVIEW

The new ISC Squirrel FLEX Tether is designed to offer the optimal balance of rigidity and flexibility for SRT Climbing with your Rope Wrench.

The Squirrel FLEX is made from a high-quality kernmantle rope, over-moulded with an advanced Polymer, selected to create a rigid tether that allows just the right amount of flex and an ultra-premium finish.

Minimising unwanted slack in a climbing system is always a high priority, so we designed the sewn eyes to offer a snug fit, firmly holding the karabiner and providing an optimal connection to your rope wrench.

The Squirrel FLEX Tether is constructed with contrasting stitching, which remains visible for easy inspections.

Team the ISC Squirrel FLEX Tether with the KL100 Accessory Karabiner, for attachment to a chest harness.

**KL100** Accessory Karabiner  
**NOT for PPE**

Patent Pending

## TECHNICAL INFORMATION

Part Code	RT300A1
Type	Twin-leg
Compatibility	APEX/Rope Wrench (all ISC models) RP282 ISC PHLOTICH Pulley KL100 Accessory Karabiner, NOT for PPE (Chest harness attachment only)
Length	310mm (11")
MBS	24kN (5395lbf)
Weight	113g (4oz)
Standards	CE Certified to PPE Regulation (EU) 2016/425, when used as part of ISC Kit KT282. Complies with ANSI Z133 UKCA
