

True-Blue

CLIMBING LINES

12-STRAND BRAIDED 100% POLYESTER CONSTRUCTION –

Each strand of True-Blue consists of blue fiber plied over white fiber to assist detection of cover wear

True-Blue is an all polyester climbing rope with high strength, low stretch, excellent abrasion resistance and a long service life. It's got a great feel with good flexibility and knot holding abilities. The single braid construction eliminates the need for milking and stays firm and round in use. True-Blue can also be used for light duty rigging applications.

True-Blue braided climbing line is a unique combination of solution dyed blue polyester fiber wrapped over white polyester in a Samson 12-Strand braid. The result is permanent color that won't fade or run, with high visibility in trees. Available by special order in white.
